Flutter Development Course Modules

📘 Module 1: Introduction to Flutter & Dart

What is Flutter and why use it

Flutter vs native development

Dart basics and syntax

Setting up Flutter environment

📘 Module 2: Dart Programming Fundamentals

Variables, data types & operators

Control statements & loops

Functions & OOP concepts

Null safety in Dart

📘 Module 3: Flutter Widgets & UI Basics

Stateless vs Stateful widgets

Widget tree & build method

Layout widgets (Row, Column, Stack)

Text, Image, Button & Icon widgets

📘 Module 4: Layouts & Responsive Design

MediaQuery & LayoutBuilder

Flexible & Expanded widgets

Responsive UI for multiple devices

Adaptive design best practices

📘 Module 5: Navigation & Routing

Navigator & routes

Named routes

Passing data between screens

Bottom navigation & drawer

📘 Module 6: State Management

setState fundamentals

Provider overview

Bloc / Cubit basics

Managing app-wide state

📘 Module 7: Networking & APIs

REST API integration

HTTP methods (GET, POST, PUT, DELETE)

JSON parsing & models

Error handling & loaders

📘 Module 8: Firebase Integration

Firebase setup

Authentication (Email, Google)

Firestore & Realtime Database

Push notifications

📘 Module 9: Local Storage & Performance

SharedPreferences

SQLite & Hive

App performance optimization

Memory management

📘 Module 10: Advanced Flutter Concepts

Custom widgets

Animations & transitions

Theme & dark mode

Background services

📘 Module 11: Testing & Debugging

Debugging tools

Unit & widget testing

Handling crashes

App stability best practices

📘 Module 12: Deployment & Publishing

App signing

Play Store & App Store publishing

Versioning & updates

Post-release maintenance

INTRO COURSE

🧱 Introduction to Flutter Development

🧠 Dart Programming Fundamentals

🎨 UI Design with Flutter Widgets

📱 Responsive Layouts & Design

🧭 Navigation & Routing

🔄 State Management Basics

🌐 API Integration & Networking

🔥 Firebase Integration

💾 Local Storage & Data Handling

✨ Animations & UI Effects

🧪 Testing & Debugging

🚀 App Deployment & Publishing

FLUTTER DEVELOPMENT COURSE

TOOLS

🔧 Flutter SDK

💻 Dart Language

🧠 Android Studio

🖥️ Visual Studio Code

📱 Android Emulator

🍎 Xcode (iOS Development)

🔥 Firebase

🌐 REST APIs

Flutter Development Course - FAQ

Q1: Who should take this Flutter Development Course?
A: This course is ideal for beginners, mobile developers, or anyone interested in building cross-platform mobile apps using Flutter and Dart.

Q2: What tools do I need for this course?
A: You will need the following tools:

- Flutter SDK
- Dart Language
- Android Studio or Visual Studio Code
- Android Emulator or physical device
- Xcode (for iOS development)
- Firebase (for backend integration)
- REST APIs knowledge (for networking)

Q3: What will I learn in this course?
A: The course covers everything from basics to advanced Flutter concepts:

- Introduction to Flutter & Dart
- Dart programming fundamentals
- Flutter widgets & UI design
- Responsive layouts
- Navigation & routing

- State management
- Networking & API integration
- Firebase integration
- Local storage & app performance
- Advanced Flutter concepts like animations and themes
- Testing, debugging, and app deployment

Q4: Do I need prior programming experience?
A: Basic programming knowledge is helpful but not mandatory. The course starts with Dart fundamentals to bring everyone up to speed.

Q5: Will I learn how to deploy my app?
A: Yes! Module 12 covers app signing, Play Store & App Store publishing, versioning, updates, and post-release maintenance.

Q6: Can I use this course to build professional apps?
A: Absolutely! You'll learn best practices, performance optimization, Firebase integration, and real-world app development skills.

Q7: How long is the course?
A: The course duration varies depending on your learning pace. Typically, it's structured to complete within 3–4 months with practice.

Q8: Does this course cover advanced Flutter concepts?
A: Yes. You'll learn custom widgets, animations, dark mode, background services, and app-wide state management.

Q9: Is this course suitable for both Android and iOS development?
A: Yes. Flutter allows cross-platform development, so all modules apply to both Android and iOS apps.

Q10: Will I get practical hands-on experience?
A: Yes. Each module includes practical exercises, mini-projects, and real-world examples to build your skills.
